SHAREFUND Financial Services

Dear Sir

Potential of working according to participation, sharing and ethical criteria financial institutions and Finance Market Estimates \$3.4 Trillion by end of 2018. Finance assets represented 1% of the global financial market of \$127 Trillion in assets.

Alternative-ethic-safe-profitable financial instruments is a centuries-old practice that is gaining recognition throughout the world and whose ethical nature is even drawing the interest of all investors.

Big potential finance investors have been trying to lead their assets to safe investments.

It is important to note that there is a need for a more efficient and cost-effective way to increase the profitability of the finance and loan market.

GulfUS Capital and US SHAREFUND is a leading alternative Financial Service Company that is focused on building dynamic, profitable, and reputable finance and investments in the United States.

The **US Share Fund operates** in accordance with the principles of interest-free financial model as a participation fund, with bonds and profit sharing accounts, and lending such funds through production support, finance lease and profit/loss sharing partnership.

Our financial models is based on four core principles: Prohibiting usury-Avoiding speculation-Avoiding gambling-Investing ethically

Although our in the financial models have many products similar to those offered by conventional banks, the two entities differ conceptually. One key difference is that conventional banks earn their money by charging interest and fees for services, whereas our in the financial models earn their money by profit and loss sharing, trading, leasing, charging fees for services rendered, and using other share contracts of exchange.

Our partner financial institutions must comply with a variety of ethic principles besides avoiding interest.

Our Fund has a wholly-owned subsidiary that generates leasing/rental income by leasing assets back to the originating company which were taken over from the originating company.

In the our mortgage system, rather than lending a customer money to buy a house, the bank will buy the house itself. The customer can then either buy the house back from the bank at an agreed-upon, above-market value paid in instalments (this is called murabahah) or he can make monthly payments comprising a rental fee and a piece of the purchase price until he owns the home outright (ijara).

Our Fund has a wholly-owned subsidiary that generates leasing/rental income by leasing assets back to the originating company which were taken over from the originating company.
