REAL ESTATE-FLIP HOUSING/COMMERCIAL-BUY/REPAIR-INVEST /SALES PROJECTS

42.4 million household live in a rented house/apartment in US. There is a housing potential for about 55 million people. According to the Fitch Ratings statement, 4.5 percent rise is expected in housing prices in the US this year.

Flip; A straight flip is when an investor buys a house that has the potential to be worth more in value after doing necessary repairs and updates. Later, the house is sold at a higher price than what it was bought thus making a profit.

Flipping houses in New Jersey (1 million Muslim Population) is a great idea due to the sheer amount of inventory available.

If you are looking for a house to flip you should look for the property in a few places.

When you are looking for a piece of property to invest try using the following:

Our partner-great realtor ReMAX knows what makes a good deal on a flip. Having an investment-friendly realtor working for you will change the game for the inexperienced investor. Not only do they know about upcoming projects but they know the process. Our realtor will often more than pay for their services by selling the house for more money than you could alone.

Investors capital should include: Purchasing the home + Making repairs + Sales

We prepared a model for "**Buy & Repair & Leaseback or Sell with the Murabaha – Mudaraba - Ijara Islamic system**" for apartment-residence units, housing, villas and commercial pieces and offices (and industrial investments, facilities, stores...) for investors. With this model will generate net annual rent and buy-sales revenue between % 15-25 for investors.
