"THE GOLD B" GOLD COINS

THE GOLD B COINS INVESTMENT

From June to December of 2018, the coin's return is currently 400%

Bill Gates (Founder of Microsoft)

"Bitcoin is a techno tour de force."

Eric Schmidt (CEO of Google)

"Bitcoin is a remarkable cryptographic achievement and the ability to create something that is not duplicable in the digital world has enormous value."

Peter Thiel (Co-Founder of PayPal)

"I do think Bitcoin is the first encrypted money that has the potential to do something like change the world."

“THE GOLD B” GOLD COINS

ABSTRACT

The first cryptocurrency, **Bitcoin**, was invented back in 2009. That was just the beginning though, and nobody really knew about Bitcoin until 2013. However, since 2013 the cryptocurrency market has seen huge growth — growth that has been hard to ignore. There are now more than **1500 different cryptocurrencies**, all created in less than 5 years.

It's clear that 2017 was the year crypto really blew up. The market cap of cryptocurrencies grew by 4000%! The market cap of all cryptocurrencies was around \$21 billion in March 2017, whereas it is **now over \$454 billion**.

The cryptocurrency market isn't just about Bitcoin anymore. There are other cryptocurrencies that have entered the space, such as **Ethereum, Litecoin, and Ripple**. All of these have performed incredibly well over the last year.

Bitcoin is the biggest cryptocurrency — it currently has a **40%** share in the total cryptocurrency market cap!

The world's number one **exchange**, as of March 2018 is **Binance**, which opened in July last year and is growing by 750,000 users a month. It now has **6 million users**, who trade \$300 each per day (on average as surveyed throughout March). This brings in revenue of \$1,350,000 each day.

Why Crypto Coins?

Over the last few years, the **digital currency** has trended upwards hitting record highs and making headlines. Bitcoin and related blockchain technologies are already beginning to be used by people, businesses, and governments around the world.

User anonymity – While each transaction can be easily traced from one address to another, the identity of users remains private and discrete. Personal purchases from

“THE GOLD B” GOLD COINS

a wallet cannot be associated with your details unless you wish to publish your transactions publicly.

No third-party influence – Unlike fiat currency which is widely controlled by central banks and governments across the globe, **Crypto Coins** is unique because third parties do not directly influence it. It operates purely on peer-to-peer transactions, guaranteeing more freedom and control for people across the planet.

Low transaction fees – Standard bank transfers involve fees. Cross-border payments attract higher costs because of intermediaries. By utilizing Bitcoin and the blockchain, transaction costs are inherently low.

Faster payments – Crypto Coins payments are seamless to complete. Unlike the traditional bank wire transfer which could take days or weeks to process, Crypto Coins transactions are handled on the more efficient blockchain network, which has no wait periods for authorization requirements.

No paperwork – With Crypto Coins transactions, forget about sending proof of address, showing your passport or ID card or going into a bank. You just need your own wallet, and an address to send Bitcoins to.

Appreciating value – Apart from being used as a digital currency, Crypto Coins can also be used as a store of value, which makes it viable as an investment.

Investors can invest in **Alternative Assets like cryptocurrency & Oil - Gas and Precious Metals** which are stored in ultra-secure offshore vaults located in a crypto-friendly jurisdiction. When you purchase Asset-coin and other cryptocurrencies, your private keys are stored in a cold wallet securely located away from any natural disaster, emergency or government confiscation. Also; User anonymity – No third-party influence – Low transaction fees – Faster payments – No paperwork – Appreciating value ...

"THE GOLD B" GOLD COINS

Who Curly Tail SA and Gold B ?

Our Curly Tail SA is an Ecuadorian based company dedicated to the management of crypto coins and have contracts to, mine and issue gold coins with one of the richest gold mines in Ecuador.

Curly Tail SA is partnered with **Gulf-US Capital and US SHARE FUND**. This partner group is a leading alternative Financial Service Company that is focused on building dynamic, profitable, and reputable finance and investments in the Gulf Countries and United States.

With \$3 Billion (USD) worth of gold in it's a portfolio, The Gold B Exchange house has laid a foundation for international banking backed by gold and insurance services. The Gold B is leasing the Ecuadorian **Super Computer systems**, worth **\$750,000,000.00 (USD)**, to many major companies.

The Gold B Exchange house started the digital currency system (powered by ERC-20, the most efficient digital encryption program under the Ethereum protocol).

This new monetary system offers protection and empowers individuals with the ability to have full control of their own money as well as prosper from the many benefits that The Gold B offers.

The Gold B possesses the clear, well-defined vision of becoming the first and most successful digital exchange house in the world.

By providing users with direct access to cryptocurrencies and an exchange house supported by gold, all funds may be instantly converted to Fiat, physical gold and other cryptocurrencies with minimal fees.

Our account holders will have the ability to receive profits not only from the exchange's financial products but also by being included in our unique multi-collaborative environment.

"THE GOLD B" GOLD COINS

By having the platform controlled by its own users, The Gold B is enabled to be a transparent system that will heavily rely on user accountability for future improvements of the exchange house.

In contrast to a traditional banking system, The Gold B allows its partners to profit and take advantage of its available financial products.

This project aims to revolutionize the conventional utilization of money by proposing an innovative way that addresses wealth redistribution.

Gold Mine Coins "GMC" coins will appreciate in USD value based on the gold being mined from the gold mine. The investors will own a percentage (based on how much is invested) of the physical rights to the minerals.

The Gold B exchange house programs the amount of coins available for distribution. Bitcoin was also programmed to have a limit on the amount of coins. After a crypto currency is programmed, the amount cannot be increased or decreased. It will be the same for eternity.

Bitcoin is programmed to be mined with a limit of 17 million coins while **The Gold B has programmed 500 million coins** to be ready for distribution without the need for mining. By having the coins readily available, the Gold B is able to buy and sell coins much more quickly than Bitcoin.

This makes The Gold B coins much easier to use than other crypto currencies and will not lose value over time like all FIAT currencies.

The price of each GMC coin will increase because it is backed by gold. **The price of each coin increases through the rise in gold prices and the amount of profits that are earned by the Gold B exchange.**

“THE GOLD B” GOLD COINS

The Gold B exchange house offers a multitude of products, such as; transaction fees for Gold B crypto coins (GMC, Gold Bank coins, Gold coins, Loan coins, etc.) along with many of the popular crypto currencies (Bitcoin, Litecoin, Ethereum, Ripple etc.), the Gold B will also make fees off of foreign exchanges, insurance products, loans (large and small businesses, cars, homes), micro-loans (small loans for individuals without a credit history or who have a very low credit score), as well as mining for physical gold to increase The Gold B reserves.

Bitcoin does not offer any of the products listed above and is not backed by gold. The price of Bitcoin is determined by speculation while the Gold B coin prices are based on intrinsic value and the products that make profits for the Gold B exchange house.

The Gold B's Gold Bank Coin had an initial coin offering that **started at \$0.50 (USD) in June of 2018. In November of 2018 it reached \$1.99 (USD) and is currently \$2.49 (USD). From June to December of 2018, the coin's return is currently 400%** if a user invested in the beginning and currently holds the coin.

"THE GOLD B" GOLD COINS

VISION

The Gold B possesses the clear, well-defined vision of becoming the first and most successful digital exchange house in the world. By providing users with direct access to cryptocurrencies and an exchange house supported by gold, all funds may be instantly converted to Fiat, physical gold and other cryptocurrencies with minimal fees.

The Gold B is committed to vastly improving the usability of cryptocurrency throughout the world. It will also give a voice to each one of its members.

By having the platform controlled by its own users, The Gold B is enabled to be a transparent system that will heavily rely on user accountability for future improvements of the exchange house.

"THE GOLD B" GOLD COINS

MISSION

The mission of The Gold B is to provide a safe and decentralized economic system in which every individual is able to equally participate.

As a result, users will have the ability to receive profits not only from the exchange's financial products, but also by being included in our unique multi-collaborative environment.

By addressing the crucial human necessity for gaining access to high-demand financial services, The Gold B embraces the duty of fostering every person under its innovative and unbiased structure.

"THE GOLD B" GOLD COINS

WHAT IS BLOCKCHAIN?

Think of Blockchain as a book or ledger of accounts and transactions but in a digital format. It is vastly superior because it stores reliable, unalterable information that must be verified by hundreds to thousands of separate machines.

In contrast, a traditional bank is the only source that will verify a transaction. Blockchain is comprised of digitally linked data modules that make every transactional move secure and guaranteed once initialized.

Altering this system is an impossible task since it is formed by blocks of encrypted information that cannot be broken.

The Gold B takes advantage of this system in order to provide cutting edge security while granting a clean circulation and storage of tokens.

Blockchain is fast becoming mainstream and has already been adopted by a number of major players and financial institutions. In April 2017 Japan made Bitcoin legal tender, leading to a huge spike in its price. Russia, China, Sweden and Israel are examining digitizing their currencies using Ethereum. The

Chicago Mercantile Exchange (CME) and the Australian Stock Exchange (ASX) have announced they are moving to blockchain for security reasons. In December 2017, the Commodity Futures Trading Commission in the US approved a futures market for Bitcoin and in January 2018 XBT Investments announced it will become the first Bitcoin investment company to list on the ASX.

Cryptocurrency daily transaction volumes have exploded from \$100 million USD a year ago, to around \$30 billion USD today. That's only set to increase – yet there are only about 170 active cryptocurrency exchange platforms taking advantage of

“THE GOLD B” GOLD COINS

this explosive growth worldwide. In January 2018 it was reported that exchanges were signing up more than 100,000 new users each day.

As more and more users adopt blockchain technology, the cryptocurrency market will begin to take market share from the global FX volume. Around \$5 trillion USD changes hands in foreign exchange markets every day, with most trade conducted between approximately 23,000 banks.

The payment processing industry (PayPal, Alipay, etc) is worth \$522 billion annually and is similarly ripe for disruption from cheaper and faster blockchain based alternatives.

The future clearly belongs to blockchain; however, the sector is still in its infancy and offers early investors the chance for immense gains as the technology continues to grow and provides improved solutions to many exchange and transactional cases.

A traditional bank is the only source that will verify a transaction. Blockchain is comprised of digitally linked data modules that make every transactional move secure and guaranteed once initialized.

Altering this system is an impossible task since it is formed by blocks of encrypted information that cannot be broken.

The Blockchain is a revolutionary technology that the Islamic finance ecosystem could leverage to exponentially enhance business processes and streamline operations. Blockchain creates the possibility of coordinating institutions' transactional activities within a strong mechanism of trust and transparency.

"THE GOLD B" GOLD COINS

WHAT MAKES THE GOLD B SO UNIQUE?

In contrast to a traditional banking system, The Gold B allows its partners to profit and take advantage of its available financial products. One of its main offerings will be to grant and offer loans for every user upon their request.

With the purpose of increasing their economic leverage, each member will be able to enjoy these benefits by instantly having access to lines of credit without a credit history check.

All that is required from the user is verification of employment and a steady paycheck. Loans from the platform will be highly accessible. Up to 90% of a user's investment will be granted as a loan.

These loans will then be repaid with an annual 10% rate of return. User's may either request a loan or have their own coins be loaned out to other users seeking a line of credit. This structure will build up liquidity for each user's account. It is important to note that each account will be insured for up to one million dollars if payment obligations are not met. In addition to all of these benefits, debit and credit cards will be provided for users in order to achieve quicker transactions with vendors.

"THE GOLD B" GOLD COINS

SERVICES AND CURRENCY SYSTEM OF THE GOLD B THE GOLD BANK COIN

The Gold B provides various types of digital currencies that adapt to the requirements of its users. This allows for a more -flexible and deficient system. The listed currencies include: Under a system of pure equality, the Gold Bank Coin is the answer for recognizing each user. In contrast to traditional banks, every holder of the Gold Bank Coin receives guaranteed and consistent profit. The only requirement of the user is to own the coin. Owning this coin also entitles each user the right to one vote on the prospective improvements of the exchange house. Every member will be capable of proposing and determining future decisions for the association. In order to gain access to all of The Gold B's offered products, a user on

GOLD COIN As the domestic currency of the system, Gold Coin will be the standardized coin for use within the exchange house. While the Gold Bank Coin offers ownership and other services for its holders, the Gold Coin will be one of the many other circulated coins on the exchange. Its growth is aligned with the current price of gold.

Through minimal commission fees, both the platform's currency and the reserves of gold are able to sustain themselves while mutually increasing one another's value. Unlike other systems in which a cryptocurrency's value will fluctuate according to short and long term investor confidence, gold's current price is a solid base to preserve the value of the Gold Coin. This is possible because of gold's independence from a volatile market as well as its ease of liquidation and exchange throughout the globe. There will always be a buyer for gold.

"THE GOLD B" GOLD COINS

GOLD BANK COIN

The gold bank is not just the first crypto bank owned by every coin holder, it's also your future bank made by the people for the people. We the people that hold the coins will make future decisions on how the bank functions and operates.

We are working on building the platform, based on the same system a bank uses now, but the profits from the bank are for the coin holders, we will have a underling crypto exchange to exchange all of the main crypto's at any moment's notice and once your currency is in the bank you are able to purchase gold stock, or Gold coin (our bank used coin) or most of the main Fiat currency's worldwide.

We are an international bank operating everywhere and accepted worldwide. We will issue visa/MasterCard debit cards, and check books on demand. We don't check credit and so long as you have a job we will give you a loan to purchase the things you need (house, car, motor cycle etc...). We will work on the PMI system that every bank uses now (personal mortgage insurance).

We will allow our other bank members to loan there money to the world, we don't loan your money. You can loan through our lending platform and make the profits for yourself, knowing that since every loan has PMI (personal mortgage insurance) you are guaranteed to get paid. You will see all the legal documents at any time so no worrying about not being paid back, even if they don't pay their loan the bank will cover you until the insurance kicks in. Then you are paid in full. 100% guaranteed this is the way your bank works now but they use your money and don't give really anything except fees on your account.

We are here for you we will have a full staff 24/7 live phone support and within the first year start breaking ground in South America and then the USA on physical bank branches to help people in need. All we need is you and we will reshape the financial world together.

Procedure: Make an account with at least \$100 US or crypto balance. Exchange Fiat currency and or crypto into bank uses Gold Coin. Make loans or use supplied debit card or checks as you normally do. No one knows you are paying with crypto and you can purchase from the world.

Future Plans

Washable tattoos for payment processing. (A retailer can scan your washable tattoo and you enter your secret pin and you can purchase anything without a debit card or digital device)

Employer payment processing systems, w/ built in accounting for the world.

Easy to use post system w/ instant payments to your account with lower fees than anybody else in the world.

Send money without boarders to anybody in the world with your voice.

THE GOLD B

The important thing is not the amount of money invested, but the amount of people who are a part of our exchange house. This will help the process of purchasing, selling, exchanging and acceptance of our currency as a payment method.

There's almost 400 Billion dollars in crypto now. By the end of the year will be about 1 trillion and it's still very hard to use crypto to just purchase a coffee at the local Starbucks.

This is because crypto is still a very new technology, or is it?

Crypto is just digital money, nothing new!

Cash is really an old way of thinking.

Most businesses don't really want cash, it's not safe and banks are now charging fees to deposit cash over certain amounts.

Our bank will give out debit cards and checks on demand with funds backed by GOLD.

Once you transfer your crypto or fiat money into your account, you are able to use it ASAP.

We are giving credit to the world. If you have a job you have credit to buy an apartment, house, car, motorcycle and so on.

This is a bank for the people owned by the people.

We are selling 500 million bank coins and every owner of the Gold Bank Coin owns a piece of the bank.

THE COIN VALUE PROJECTIONS

Once the pre-sale for friends and family is finished, the price of the coin will be \$0.67 cents. The price of each coin will then gradually increase as the launch date approaches.

After 6 to 8 months we estimate the price will be at \$50

JOIN FOR FREE

Take the first step by joining the future, moving forward to make the world a better and safer place to be, for your family and generations to come.

“THE GOLD B” GOLD COINS

LOAN COIN

Loan Coin is purely dedicated to the activity of borrowing money between users. Through local and international territories, Loan Coin may be used without restrictions.

Contrary to the traditional banking system, Loan Coin is a solution to decentralize the autonomy of common institutions.

The Loan Coin will give total power to its users regarding their financial loan management. By means of mortgage insurance, every user is out of risk from losing their initial investment.

The value and the benefits of the Loan Coin stay where they belong, in the hands of the users.

The annual rate of return for these loans can range from 6-16% based on the exchange house's own interest rates. The returns from these loans benefit anyone who owns coins through The Gold B.

"THE GOLD B" GOLD COINS

HALAL GOLD COIN

Experts report a constant rise in Islamic finance over the last decade. In September 2018, Daily News wrote that the annual growth of this market is 10-12 percent over the past 10 years. the value of Islamic finance as \$2.2 trillion and the Islamic Finance industry is spread over more than 60 countries. The experts predict Islamic finance to grow to \$3.8 trillion by 2022.

Some Islamic scholars recently declared Bitcoin "permissible" under Sharia law, thereby opening the market to 1.6 billion Muslims around the world (For references, you can review this link) [HALAL CRYPTO COINS](#)

Islamic Finance investors based in the United Arab Emirates , is planning to launch **Islamic Crypto Exchange** which will be operating "according to the principles of Shariah law." The company is expecting to reach \$146 million daily trading and \$4.4 billion monthly turnover by 2020

Throughout financial turmoil, GOLD remains solid and preserves wealth. **Gold Mine Coin " GMC "** is suitable for investors seeing a partnership of physical Gold mines and Gold Bank as a 'safe haven' investment and an absolute crisis protection without taking on a SHARI'A COMPLIANT issuer risk.

It is apparent that the characteristics and conditions of **Blockchain** are in alignment with the **principles of Islamic Finance**. In addition, its usage would open the ecosystem to a raft of interesting opportunities. More importantly, Blockchain is a perfect medium to incorporate and operationalize Islamic values of justice, equality, trust and fairness into finance which embodies the spirit of the Shariah.

"THE GOLD B" GOLD COINS

Different of the fast-developing Bitcoin systems in the world, our Gold Bank partners and shareholders are indexed to the gold reserves.

What is more **Bitcoin may be more Halal than modern fiat money**. (Matthew) puts it quite clearly as he remarks, "Bitcoin is more halal than any currency in wide circulation today but probably still falls short of the strict and narrow definition of money in Islam. Modern sovereign currencies are based on debt with usury - this is strictly prohibited in Islam. Therefore, all modern money is not halal. Bitcoin, on the other hand, is not based on debt - it's based on a proof of work - and this is at least not haram

With this difference, we offer a brand-new Halal financial product that can be easily used in Islamic countries and all Muslim investors.

Under the Islamic finance criteria, subsidized monetary systems, trading and interest-free trade are encouraged.

Our Gold B Coins distributions are the investment profits of Gold B.

All of our investors and users are partners of Gold B. The savings and returns in our system are shareholding shares.

Our Gold Mine Coins-GMC coins will appreciate in USD value based on the gold being mined from the gold mine.

The investors will own a percentage (based on how much is invested) of the physical rights to the minerals.

The profits are distributed among account/coin owners, therefore the income is halal. No profits will be made off of interest.

“THE GOLD B” GOLD COINS

As the Gold B Exchange House, we are also offering unique financial services that benefit our Muslim account holders, such as:

Trade and borrowing to purchase properties, cars etc. without paying interest.

In contrast to a traditional banking system, The Gold B allows its partners to profit and take advantage of its available financial products. One of its main offerings will be to grant and offer loans for every user upon their request.

This transaction allows the Bank to purchase the property first for the client and sell it back to the client with an agreed price and fixed payment plan for each month.

This excludes the interest system totally from the transaction for Muslim clients.

Under the Islamic finance criteria, subsidized monetary systems, trading and interest-free trade are encouraged.

Our Gold B Coins distributions are the investment profits of Gold B.

All of our investors and users are partners of Gold B. The savings and returns in our system are shareholding shares.

Though traditional banks have been already actively joining the blockchain community for a comparatively long time, Islamic banks that build their work in compliance with Sharia principles used to stay aside from the newly developing trends. Nevertheless, Al Hilal Bank, based in Abu Dhabi, has changed the game.

The UAE-based Islamic Al Hilal Bank has announced that it has managed to complete “the world’s first Sukuk transaction” with the help of blockchain technology. Sukuk represents itself a legal instrument and is also known as “sharia compliant” bonds.

"THE GOLD B" GOLD COINS

WORLD X COIN

The World X Coin will serve as a currency inside of an exclusive virtual world within the platform. Like the coin's name, the VR world is called World X.

Not only is this virtual world used as a means of entertainment for all users, but it is also used as a way to overcome geographic and cultural barriers.

The World X coin is an important asset that will be utilized in connecting people. The possibilities of this virtual world are only limited by a user's creativity.

Once a user is fully immersed in this world, it will be possible to fulfill personal objectives such as anything like learning a new language or the discovery of unusual places around the globe. The system is enabled to provide its users with an efficient process for cultural and financial exchange.

"THE GOLD B" GOLD COINS

ASSET COINS

Investors can invest in Alternative Assets like cryptocurrency & Oil – Gas-Gold and Precious Metals which are stored in ultra-secure offshore vaults located in a crypto-friendly jurisdiction. "THE GOLD B" GOLD COINS

RENT COIN

This currency comes up as a solution for users who desire to rent immovable properties.

It seeks to prevent common problems that occur in current property administration software by providing the user with a more efficient and immediate payment process.

Rather than using the slower and more expensive payment software, The Gold B provides a faster and easier experience that is much more cost-effective for the property owner and tenant.

Additionally, an insurance system will work in tandem with Rent Coin so that both parties are protected.

"THE GOLD B" GOLD COINS

PETS AND NATURE PROTECTION COIN

This coin gives users the ability to donate to causes like the protection, preservation and development of animal life.

Rather than use a more traditional donation system, Pets and nature protection Coin provides a legal safeguard that gives prominence and seriousness to every user's contribution.

The Gold B's transparent system ensures that their donations are going directly to the causes they endorse.

As a user of this platform, you will know exactly where your money is going.

"THE GOLD B" GOLD COINS

RELIGIOUS COIN

Religious Coin is a currency geared toward patronage and support for different religious institutions.

Taking into account that spirituality is an inherent element for the majority of human beings, The Gold B's Religious Coin is curated for religious based donations to the virtual era.

This process is carried out in a direct and efficient way by sending 100% of the proceeds to its recipients.

“THE GOLD B” GOLD COINS

HELP COIN

As an international exchange house with enormous resources, The Gold B is committed to social responsibility and everything it affects.

Help Coin’s function is to empower users with the ability to donate to the causes they are passionate about.

A user will have the power to donate to any institution, group of people or cause they deem worthy of their support with a direct donation.

"THE GOLD B" GOLD COINS

COLLEGE COIN

Education represents one of the most fundamental resources an individual has access to.

College Coin has the mission of acting as an incentive for users to save money and time.

This currency must be kept for a minimum period of 5 years in a Gold B account.

Since College Coin is directly invested into the bank of gold, its growth is directly correlated with the interest payments it will receive from being loaned to other users.

This makes it an excellent option for anyone who wants to be a student at any institution around the world.

"THE GOLD B" GOLD COINS

"THE GOLD B" GOLD COINS

CONCLUSION

From your own experiences in dealing with the current monetary system, it is abundantly clear that it does not have your best interests or seek to benefit customers.

The Gold B meets the current demand of its users and offers a system that cannot be controlled by one entity. It fulfills the obligations of all users equally and without discrimination on the size of each account. It allows access and opportunities that no other system has available to the public at this present time. The users control every aspect of their funds within their accounts.

Every coin is truly their own coin and can be accessed or exchanged at any time and anywhere.

All without the inconvenience of frivolous fees and arbitrary rules on how one may obtain their money. Our main goal is to constantly improve these services.

The Gold B exchange house programs the amount of coins available for distribution. Bitcoin was also programmed to have a limit on the amount of coins. After a crypto currency is programmed, the amount cannot be increased or decreased. It will be the same for eternity.

Bitcoin is programmed to be mined with a limit of 17 million coins while The Gold B has programmed 500 million coins to be ready for distribution without the need for mining. By having the coins readily available, the Gold B is able to buy and sell coins much more quickly than Bitcoin.

This makes The Gold B coins much easier to use than other crypto currencies and will not lose value over time like all FIAT currencies.

"THE GOLD B" GOLD COINS

The price of each GMC coin will increase because it is backed by gold. The price of each coin increases through the rise in gold prices and the amount of profits that are earned by the Gold B exchange.

The Gold B exchange house offers a multitude of products, such as; transaction fees for Gold B crypto coins (GMC, Gold Bank coins, Gold coins, Loan coins, etc.) along with many of the popular crypto currencies (Bitcoin, Litecoin, Ethereum, Ripple etc.), the Gold B will also make fees off of foreign exchanges, insurance products, loans (large and small businesses, cars, homes), micro-loans (small loans for individuals without a credit history or who have a very low credit score), as well as mining for physical gold to increase The Gold B reserves.

Bitcoin does not offer any of the products listed above and is not backed by gold. The price of Bitcoin is determined by speculation while the Gold B coin prices are based on intrinsic value and the products that make profits for the Gold B exchange house.

GREAT EARNING/PROFIT OPPORTUNITY;

The Gold B's Gold Bank Coin had an initial coin offering that **started at \$0.50 (USD) in June of 2018. In November of 2018 it reached \$1.99 (USD) and is currently \$2.49 (12.25.2018). From June to December of 2018, the coin's return is currently 400%** if a user invested in the beginning and currently holds the coin.

GUARANTEES AND ADVANTAGES FOR INVESTORS;

- 1) In contrast to a traditional banking system, The Gold B allows its partners to profit and take advantage of its available financial products. One of its main offerings will be to grant and offer loans for every user upon their request. This transaction allows the Bank to purchase the property first for the client and sell it back to the client with an agreed price and fixed payment plan for each month. This excludes the interest system totally from the transaction for Muslim clients.
- 2) With the purpose of increasing their economic leverage, each member will be able to enjoy these benefits by instantly having access to lines of credit without a credit history check. All that is required from the user is verification of employment and a steady paycheck. Loans from the platform will be highly accessible. Up to 90% of a user's investment will be granted as a loan.

"THE GOLD B" GOLD COINS

- 3) Users may either request a loan or have their own coins be loaned out to other users seeking a line of credit. This structure will build up liquidity for each user's account. It is important to note that each account will be insured for up to one million dollars if payment obligations are not met.
 - 4) In addition to all of these benefits, debit and credit cards will be provided for users in order to achieve quicker transactions with vendors.
 - 5) Under a system of pure equality, the Gold Bank Coin is the answer for recognizing each user. In contrast to traditional banks, every holder of the Gold Bank Coin receives guaranteed and consistent profit. The only requirement of the user is to own the coin.
 - 6) A one million dollar investment in the Gold Bank coin gains the investor a seat on the Board.
 - 7) You will be able to open a Tax free "Gold Mine Coin" GMC account as well as a Gold Bank Coin account with The Gold B Exchange House.
 - 8) You will be a shareholder in the **gold mine and gold reserves**.
 - 9) Our gold mine producers guarantee annual **gold bullion production**.
 - 10) You will be tax-free advantageous accounts in **Gold B Exchange House and "GMC"**.
 - 11) Gold bars will be stored in the **US**.
 - 12) You will be able to open "**Gold Mine Coin" GMC " accounts at The Gold Bank**
 - 13) You will be a **shareholder** at "**The Gold Bank**"
